The Exclusive Trolley - Handmade in Germany JuCad (pronounced "UCad") caddies are hand and custom made in Germany at the highest quality standards with high tech materials and aerospace precision, resulting in a product with exceptional functionality and value. Established in 1980 Jutec Biegesysteme GmbH is a family owned business located in Limburg, Germany with a long tradition in tubular metal forming and assembly at state-of-the-art levels. The design and construction of JuCad golf trolleys embody this wealth of experience in looks, function, quality and performance and have made JuCad a long term market leader in Germany and throughout Europe. JuCad caddies are now available in partnership with Bat-Caddy® the North American leader for electric motorized golf push carts. These super-light and strong electric caddies offer you a maximum of flexibility, durability, aesthetic beauty and performance. With packing sizes of as small as 25.6 x 13.8 x 5.9" JuCad caddies fit into the smallest sports car trunk or even can travel together with your golf clubs in a travel cover. With a total weight of only 12.1 lbs, incl. a high performance Lithium-Ion battery,they are amongst the lightest caddies in the world. The two high precision motors are synchronized and virtually noiseless and are integrated into an extremely thin axle with no cables visible, making the JuCad virtually indistinguishable from a manual push cart. Remarkable operational features include: seamless rotary speed control, drive/neutral switch, automatic pre-set distance control (10, 20, 30m), integrated cruise control with automatic electronic brake/acceleration when going downhill or uphill, rechargeable lithium ion remote control with On/Off switch, belt clip and safety shut-down when caddy gets out of range. JuCad caddies also have a seamlessly height adjustable handle, folding and

turning bag supports, freewheeling capability and durable air cushioned tires. The wheels are made of a high strength composite, and the caddies can be individually customized with a large choice of colors for frame, wheels and tires making them an engineering piece of art. A useful set of high quality accessories are also included. To top it off JuCad offers a 5 year warranty on the entire frame. Here are the features and benefits summarized: Super-light, strong and durable frames and components made out of titanium, carbon fiber or stainless steel Powerful, quiet, precision, miniaturized electric motors Cables, wires, electronics integrated into frame and invisible Simple manual operation due to seamless rotary speed control, Drive/Reverse/Neutral switch and pre-set distance control Remote operation via rechargeable compact lithium-ion remote control featuring On/Off switch, pre-set distance control, safety shut-off function and convenient belt clip Smart cruise control function with electronic brake preventing acceleration of the caddy going downhill High performance super light lithium-ion battery, incl. charger rated for 500+ charges Freewheeling capability Extremely strong composite wheels with interchangeable air cushioned tires Height adjustable handle bar and foldable bag supports Extremely light weight: 12.1 lbs (titanium), 12.8 lbs (carbon), 15.9 lbs (stainless steel) Compact packing size: 25.6 x 13.8 x 5.9" High end accessories included: umbrella, cup holder, scorecard holder, travel bag. Additional accessories available. 5 Year warranty on frame
